

Outdoor Casing for People Counters

Robust Weatherproof Casing for Display, LoRaWAN, USB and Wireless Models

Moulded from the finest commercial grade plastic, the weatherproof case is designed to withstand the harsh outdoor elements whilst providing superior security for the counter sensors.

The standard People Counters are inserted into the specialised Outdoor Casing, and for the USB models an USB access point is provided to insert the USB memory stick for data download.

(Case Dimensions: 145 x 100 x 50 mm - approx)

IP54 Outdoor Casing for Display and Wireless Models

Our LCD Display and Wireless People Counters can be optionally ordered with a robust IP54 rated case.

The IP54 case ensures that the internal electronics are protected from the harsh outdoor elements and provide a high level of protection against water and airborne particles like dust.

The units require no maintenance other than battery changes and for the LCD Display model the 6 digit display is reset with the supplied magnet.

Optional metal brackets are also available for easy installation of the People Counters with the IP54 Outdoor Casing.
