

LCD Display People Counters

- Easy Installation
- Battery Powered - No Wiring
- Displays Count Value up to 6 Digits
- Separate Count for In/Out
- European Designed and Built

EvolvePlus offers highly-accurate infrared-based people counting solutions to gather valuable customer information. Our completely wireless People Counting System offers a reliable, user-friendly, and affordable tool that will help almost any type of organisation operate more efficiently.

The small size and weight of our battery powered People Counters allows for installation almost anywhere. Our People Counting Systems are designed and built in Europe for the highest quality whilst remaining one of the most cost-effective counters on the market.

Our LCD Display People Counters feature an on-board display that can display the current count with separate values for inbound and outbound traffic.

The door counter has 2 parts, a transmitter and receiver, which are positioned across the entry (max 8m) and generate a beam that is broken by people passing through.
