

Event Booking Solutions

BookingsPlus Event Booking Management is part of an integrated suite of web applications for event listing, booking and creating event registration pages. The online event registration module makes planning your event simple and hassle free, with the ability to brand your events page with your existing visual branding.

Registrants to your events are still able to make phone/over-the-counter bookings as well as registering online or verified against a central database e.g. library management system.

Easily see the all the upcoming events in a calendar view, hover over or click the event to see more detail. There is an event search function and events can be filtered by location. Registrants can also self manage their bookings online.

Intelligent Recurring Bookings

Easy BookingsPlus recurrence options allow you to repeat a seemingly complex booking with no fuss. For example, select repeat every weekday for the next two weeks.

Booking Types

Many events have are usually targeted to a particular group (child, adult, business, training, etc), and BookingsPlus has been built to handle them all. Add as many as you need, including setting individual parameters for each group type.

Promote your Events

A powerful module has been developed allowing you to tag particular events to be displayed as a slide show on your website or in-house TV screens.

Event Ticketing

Attendees can print tickets from home. Each ticket contains a QR Code which can be scanned by event staff using a smart phone or tablet to record attendance to the event.

Authentication

BookingsPlus is cleverly configured to authenticate registrants using popular protocols like SIP2, SOAP(Web Services) together with traditional methods of online registration and staff assisted bookings.

Useful Reports and Statistics

Find out which event types are most popular within your organisation through the reporting screen.

Your Complete Resource Booking Solution

BookingsPlus is more than an online Event Booking Management system.

It also offers room bookings management, public access PC bookings, fleet vehicle booking or anything in between, and are all offered as a scalable cloud solution.

Other integrated components of BookingsPlus include:

- Room Bookings Management with user defined fields
- Public Access PC Bookings & Client Software
- Game Console Bookings
- Library Noticeboard and Automated TV Display modules
- Staff Leave Request module
- Optional RefPlus module for Reference Tracking and Customer Requests
