

Room & Resource Booking Solutions

BookingsPlus Resource Booking Management is part of an integrated suite of web applications that streamlines the booking and availability of rooms and other resources.

It can be a challenge managing multiple rooms/resources. Using BookingsPlus you can simplify the booking process in real-time and eliminate wasted time juggling your resources in error-prone spreadsheets, outlook calendars, forms and emails.

Single Calendar View Across All Rooms/Resources

Using a colour coded calendar view you can easily see the availability of rooms/resources either by day or by week. You can even book multiple rooms/resources at the same time - no need to enter information multiple times.

Intelligent Recurring Bookings

Easy recurrence options allow you to repeat a seemingly complex booking with no fuss. For example, select repeat every weekday for the next two weeks. BookingsPlus will also highlight any unavailable times.

Booking Notes & Custom Fields

With each resource/room having different requirements, BookingsPlus provides the flexibility to configure notes and custom fields - for example: define text fields such as "Payment Details" or "Number of Guests" and drop down lists such as "Deposit Paid".

Self-Service Room Bookings

Public users can make their own room bookings, with confirmation of their reservation to follow. As an online solution, our Resource Booking System allows users to view availability and create reservations 24/7.

More Than Room Bookings

BookingsPlus lets you manage a lot more than your rooms. In fact, just about any facility or resource can be managed and tracked with the same ease and flexibility. Here are just a few examples of what organisations are using BookingsPlus for:

Car parking spaces
Loan equipment

Fleet vehicles / pool cars
Sporting fields

Hot desks
Specialist equipment

Your Complete Resource Booking Solution

BookingsPlus is more than a Room/Resource Booking Management system.

It also offers event bookings management, public access PC bookings, staff leave request forms, reference tracking all offered as a scalable cloud solution.

Other integrated components of BookingsPlus include:

- Online Event Management with Calendar Summary
- Public Access PC Bookings & Client Software
- Game Console Bookings
- Library Noticeboard and Automated TV Display modules
- Staff Leave Request module
- Optional RefPlus module for Reference Tracking and Customer Requests
