

Mounting Bracket Options for People Counters

The “PT” Series People Counters incorporate a mounting plate as part of the product design for easy installation on flat surfaces. The following are a list of optional mounting brackets that can purchased for the people counters.

Metal Rotational Bracket

The versatility of the pivoting door sensor holder makes fitting simple at entrances where the mounting location may not be at right angles.

These provided in a black finish and supplied as a set of two.

Metal Angular Bracket

This sleek looking bracket is suitable for door/frame mounting for use when fixing the people counters flush against a wall is not possible. This heavy duty bracket also protects your counters from getting knocked out of alignment.

These are provided in a black finish and supplied as a set of two.

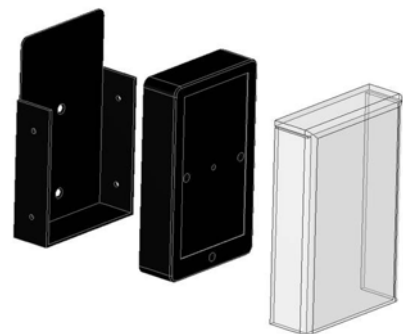

Protective Brackets

Consisting of a rear/side mounting bracket with a clear plastic cover, these brackets provide robust housing for people counters that require additional protection when mounted in tougher indoor conditions areas like washroom entrances.

Note: these brackets are only available for the Wireless and LCD Display models, are not weatherproof, and are supplied as a set of two.

Refer to the separate Outdoor Solutions brochure for details on the weatherproof, IP54 and outdoor cases.
